SYSTEMS

OUR STORY

What began as just a small seed of an idea in Grand Junction, Colorado has grown into a full scale design and manufacturing company that produces state of the art surface ice rescue equipment on an international scale. At Ice Rescue Systems, we strive to go beyond producing quality ice rescue equipment by embodying the values and spirit of brave rescuers from the past, present and future. Since the beginning, our advanced ice rescue equipment has set new industry standards for design, performance and excellence. We know that our

rescue professionals from around the world, who are passionate about creating innovative ice rescue equipment. Our team knows first-hand the challenges associated with operating ice rescue equipment in high stress situations. When it comes down to it, we are visionaries—it’s just who we are! We examine the status quo of ice rescue gear with a critical eye; our aim is to make improvements—that led us to the invention of the Ice Rescue Rapid Transport Sled equipped with the Tactical Reach Pole and Pro-Recon Water Rescue Sling. We feel that this is the best ice rescue equipment package on the market. Ice Rescue Systems would like to thank the many experienced rescue professionals worldwide, whose immeasurable energy and dedication motivates us to improve our ice rescue equipment and ice rescue gear packages.

RAPID TRANSPORT SLED KITS

The R.T.S. (Rapid Transport Sled) for ice rescue is the rescuer's choice in ice extrication and victim care. The R.T.S. is precisely designed for ease of operation. The R.T.S. takes the rescuer out on the ice, through the water and back up on the ice. Through the years we have taken numerous suggestions from rescuers in terms of what they want in an extrication sled. The R.T.S. is a product of the fact that we are trainers and rescuers ourselves.

We have shared the same experience on the ice, water and snow; with this experience and collaboration behind us, we have developed the R.T.S. a state of the art ice rescue extrication device.
