Reserve your seat today.

This course is designed for:

- + POLICE + SAR**
- + EMS + FIRE RESCUE**

LEVEL II

The level II system we put in place is for rescue scenarios which involve rescuing victims from distances greater than 250 feet from shore and require rapid deployment. We focus on rescuing multiple victims using a more advanced “conveyor system” for fast and efficient extrication. The system uses an in-haul and out-haul method that will offer the rescuer rapid victim extrication from weak and unstable ice conditions. During the Surface Ice Level II course we will emphasize proper handling and care for victims that are or may be hypothermic. We examine past rescue incidents and how they were handled to better prepare for safer more effective future rescues. This course is an extremely dynamic class that requires everyone on the shore to maximize a successful outcome. By the end of this course the rescuer will have more knowledge and will be safer and more effective with multiple victims at longer ranges.

Surface Ice Level II highlights:

- Long-range rescues (greater than 250 feet)
- Multiple victim extrication
- Advanced system set-up
- Ropes and rigging
- Dynamic in-haul and out-haul operations
- Color-coded systems for the best communication practices
- Advanced equipment and rescue techniques
- Advanced care for hypothermic patients

Student Volume Pricing

1	Student: \$649 ea.
2-3	Students \$599 ea.
4-7	Students \$549 ea.
8-10	Students \$449 ea.
11+	Students \$395 ea.

* Must be from same department
